

## CASE STUDIES FROM OUR INVESTMENTS

# PEEL LAND & PROPERTY

### ISO 50001

Peel Land and Property is proud to be the first major property company to achieve the energy management standard ISO 50001 which was awarded in 2015. It promotes sustainability across its diverse range of assets.

Peel Land and Property supports the charity Once Upon a Smile which does amazing work for bereaved families in the North West and further afield. Based in Trafford Park, this charity provides financial support, respite and continued emotional support for many families who find themselves in devastating circumstances with the loss of a parent or child.

Specifically, funds contributed have helped the charity fund a respite residential weekend for bereaved children which provides teenagers with a well-deserved break away from the sadness and pain, a time to 'be a child' and to build positive relationships with other grieving children and share their thoughts and feelings.

### SUSTAINABLE STAFF CONFERENCE 2017

For their third annual staff conference, Peel Land and Property worked closely with EventCity to increase the sustainability of the event. The Green Team liaised with the Head of Catering at EventCity, who sourced 100% compostable cups and lids from Vegware. The cups and lids look the same but use low carbon plant-based materials to replace the plastic components and can be composted along with food waste.

The Green Business scheme is run by Groundwork, a local environmental charity based in Trafford Park, who will help Peel Land and Property demonstrate its commitment to green business objectives. Membership gives access to their Green Business Awards scheme, which Peel Land and Property intends to enter in the future.
